VJH1 Isolator (Isolated Single-output and Isolated Dual-output Models)

General

The VJH1 is a compact, plug-in signal isolator that converts DC voltage or DC current signals into isolated DC voltage or isolated DC current signals.

The VJH1 isolator features:

- a wide choice of input and output signal ranges;
- four isolated ports (input, output-1, output-2, power supply and grounding) on a dual-output model;
- a withstanding voltage of 2000 V AC;
- a wide supply voltage range supporting both 100 V and 200 V power lines of AC or DC;
- close side-by-side mounting; and
- capability for fast-response model.

Standard Performance

Accuracy rating: $\pm 0.1\%$ of span (aside from the $\pm 0.1\%$ accuracy of the external resistor on currentinput models); accuracy is not guaranteed for output levels less than 0.5% of the span of a 0-X mA output range type.

Response: 150 ms for a 63% response (10 to 90% change of range)

Insulation resistance: $100 \text{ M}\Omega$ minimum at 500 V DC between input, output-1, output-2, power supply and grounding terminals mutually

Withstanding voltage: 2000 V AC for one minute input, (output-1, output-2), power supply and grounding terminals mutually; 1000 V AC for one minute between output-1 and output-2 terminals

Operating temperature range: 0 to 50°C

Operating humidity range: 5 to 90% RH (no condensation)

Supply voltage range: 100-240 V AC/DC \approx (-15, +10%)

50/60 Hz or 15-30 V DC = (±20%)

Effects of power line regulation: Up to $\pm 0.1\%$ of span for a supply voltage range of 85 to 264 V AC (47 to 63 Hz), 85 to 264 V DC or 12 to 36 V DC

Effects of ambient temperature variations: Up to $\pm 0.2\%$ of span per 10°C

Current consumption: 118 mA at 24 V DC

Power consumption: 5.3 VA at 100 V AC; 7.4 VA at 200 V AC

Conformance to EMC Standards

Applicable EMC standard: EN55011: 1991 Class A Group 1 for EMI (emission) regulations EN50082-2: 1995 for EMS (immunity) regulations CE-certified models mean those which are CE certified on condition that they be operated over a supply voltage range of 15-30 V DC =($\pm 20\%$) only.
